

CES 2023 Coverage Summary

Global media attention increases as CES returns to on-site format

The on-site CES 2023 event sparks high media interest (+16%) from global markets with 3,200+ exhibitors from 173 countries and nearly 5,000 registered media in attendance. On-site journalist and user experiences result in higher social engagement (+51%). Furthermore, international media is at a three-year high, driving 61% of CES's 2023 reach, up 9 percentage points over 2022 and 15 percentage points since 2021.

Smart Home gadgets and software continue to play a key role post-pandemic, remaining in the top trend spot at CES. Heralding gadgets for better security, energy management, and cleaning at home, journalists agree the event was a huge success for the Matter connectivity alliance ensuring compatibility with Amazon, Google, Apple, or Samsung devices.

'Mobility' in-focus as lines between auto and tech sectors blur

Automotive brands are a mainstay at the event as Sony and Honda unveil its new car brand Afeela, BMW show its high-tech I Vision Dee concept, and VW decides to celebrate the name reveal of its new "ID.7" at CES. While these product reveals by automotive OEMs are successful, Samsung and Google draw attention for focus on in-car experience technologies.

'Sustainability a top priority for major brands; "humanization" of tech is omnipresent

Companies often lead with sustainability during keynote presentations (e.g; Samsung and Patagonia partnership; John Deere's Robot Planter). Brands (Sony, Bosch, BMW) highlight reusability and doing more with lower power consumption via the circular ecosystem and sustainability. Additionally, brands assuage stereotypes of a sterile, machine-based future by leaning into tech as a facilitator of human connection and accessibility.

CES 2023 Key Learnings

CES 2023 demonstrates that in-person events are still just as important and relevant in a post-COVID world

This year's show generates 2.5 times as much media coverage as the fully virtual CES held in 2021, returning to pre-pandemic highs. With coverage becoming significantly more international and social engagement on the rise, CES continues to be a preeminent venue for brands looking to make big announcements and reach broad, global audiences.

Content is king! Tech/Product proves more important than presentation format in battle for attention

Sponsoring a keynote is not necessary nor a guarantee in driving media and consumer interest. Regular press conferences, invitation-only or other individual events generate attention if the technology, product or innovation presented is novel, tangible, solves a problem and/or is visually compelling, as summarized by <u>CNET's</u> feature guidelines.

Brands could better leverage the pre-show phase and benefit from more focused media interest

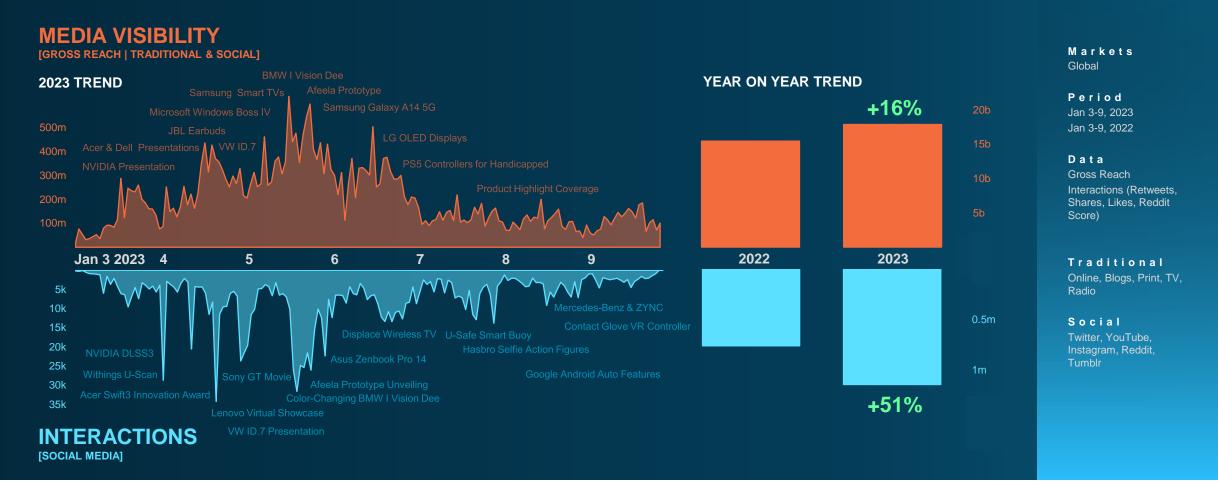

While CES still generates majority of coverage during the actual show days, news density creates a highly competitive environment in terms of media attention. Brands might consider better utilizing the days ahead of the actual CES event to kick off communication activities, as those offer great potential for undivided media attention.

Visibility Trend

Visibility and social interactions both increase compared to CES 2022 as automotive brands boost performance again and smaller brands score interactions with new gadgets.

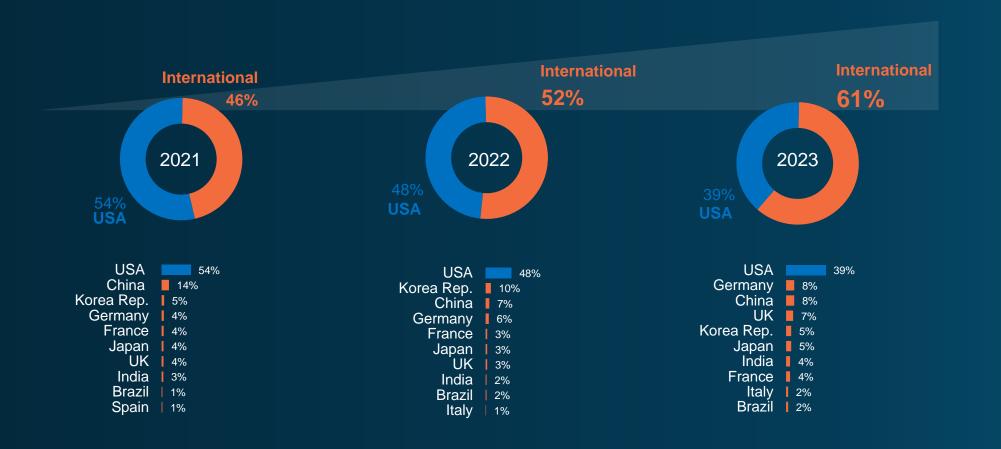

Domestic vs. International Media Focus

Media visibility continues trend toward a more international audience.

The Importance of Pre-Show Comms

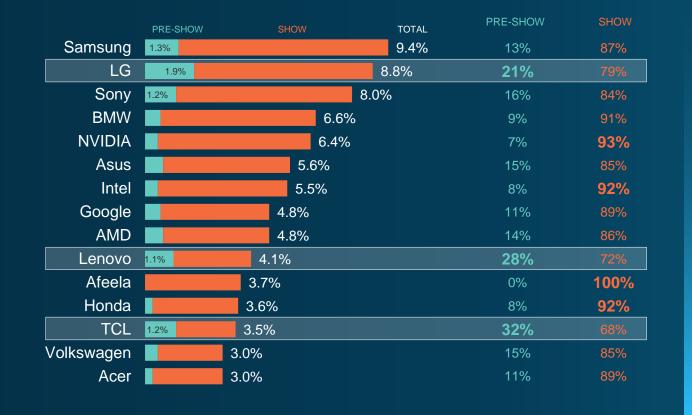

Overall communication timing was clearly focused on the show phase. Only a few brands like LG, Lenovo and TCL successfully took advantage of the less competitive pre-show phase to gain undivided (media) attention.
